

## NOTE TO THE AUTHORS

The new series of **ANALELE UNIVERSITATII BUCURESTI - CHIMIE** publishes original papers and short notes in all fields of chemistry, in English language.

All contributions are carefully revised by two referees. The *Editor-in-Chief* makes the decision whether the typescript is accepted for publication as it is, or revision is considered for publication, or it is rejected, and the corresponding contributor is advised via e-mail.

The camera-ready typescript submission will be made as print copy or digital copy (via e-mail to: [anunivch@gw-chimie.math.unibuc.ro](mailto:anunivch@gw-chimie.math.unibuc.ro) or [ioana\\_rs@yahoo.fr](mailto:ioana_rs@yahoo.fr)). Please note that the electronic copy is mandatory for any of the two choices of submission. The typescript should be made on an IBM or IBM-compatible machine, with MICROSOFT Word processor (allowed version – up to 2007).

Camera ready preparation:

*please visit:*

**<http://gw-chimie.math.unibuc.ro/anunivch>**

*and download the template.*

<b>It is advised that contributor(s) should develop their typescript by applying the only template downloadable format.</b>
---

The paper should not exceed 8 pages in length (it would be helpful an even number of pages e.g. 6 or 8), with maximum 6 pictures and tables (avoid drawing and writing the same data).

For article's title use Title of Contribution Style. It is followed by contributor names (author Style), abstract (abstract Style), Introduction (Heading 1 Style), Experimental (Heading 1 Style), Results and Discussion (Heading 1 Style), Conclusion (Heading 1 Style), Reference (Reference Title Style). Experimental and Results and Discussion Sections may have some explicit title determined by the actual paragraph content. Author names format will be J. Kennedy, Kristina Appleton. The footnote of the first page will be the affiliation of the author(s), including e-mail address for further correspondence.

For paragraph text use Normal Style. Do not indent first line of the paragraph.

When including equation use equation Style, with the Equation Editor Settings accordingly. If text refers to equation, a number (continuous numbering starting from 1, between brackets) should be mentioned right flush (use tabs to center the equation and also to right sided position of the equation number).

All pictures and tables will be included at their right place, at the nearest distance from the referred text, preferably on the same page. Text reference should be Fig. 1, Figs. 2 and 3, or Table 1, Tables 2 and 3.

Pictures should be drawn by the help of the most appropriate processor, e.g. for graphs MS Excel, Microcal Origin, SigmaPlot, Table Curve, PeakFit etc, for drawings Corel Draw, Adobe PhotoShop, PhotoFinish, MS Paint etc. Photographs and pictures acquired with scanner should bear at least 150 dpi resolution. All picture-included notations will be made only with Times New Roman (10 pts full size) or Symbol (16 pts full size) – see Equation Editor's definition for guidance. For picture place use Picture Place Style. Figures will be followed by a legend (numbered continuous starting from Fig. 1). For figure legend use Figure Caption Style (note that numbering is double underlined e.g. **Fig. 1** *Figure Caption*).

Tables will be preceded by a title (numbered continuous starting from Table 1). For table title use Table Caption Style. Table content will be typed in Table Text Style. Tables will be bordered only with horizontal borders, separating the start, the heading and the end of the table. All Tables will be centered between paragraphs and will have a row depth of at least 5 mm.

Avoid using large tables or figures (120 mm maximum width, 180 mm maximum height).

All papers will be ended by a reference section. The reference caption number given in paragraph text will be continuous starting from 1, e.g. [1] or [1,2÷7] for multiple reference.

For reference text use Reference Text Style.

Periodicals will be referred as follows: Author 1 (Last Name, First Name Initial.), Author 2 (Last Name, First Name Initial.) and Author 3 (Last Name, First Name Initial.) (Year) *Periodic Title* (single underlined) **Volume Number** (double underlined), pages.

e.g.:

Doe, J., Keaton, M. and Hu, L. (1996) *Combustion Science and Technology* **4**, 146-80.

Books will be referred as follows: Author 1 (Last Name, First Name Initial.), Author 2 (Last Name, First Name Initial.) and Author 3 (Last Name, First Name Initial.) (Year) **Book Title** (double underlined), vol. no (where applied), Publisher, City, pages.

e.g.:

1. Doe, J., Keaton, M. and Hu, L. (1996) **Handbook of Macromolecules**, vol. I, John Wiley & Sons, New York, 146-80.

Patents will be referred as follows: \*\*\* Author (Last Name, First Name Initial.) or Company, *Country* (single underlined) **Patent Number** (double underlined), Chemical Abstract Quotation.

e.g.:

2. \*\*\*Jones, M., *British Patent* **601238**, 1954, *54*, 12808.

Special Reports will be referred as follows: \*\*\* Author (Last Name, First Name Initial.) or Company (Year) *Special Report Title* (single underlined), pages.

e.g.:

3. \*\*\*NASA Release (1997) *Fire, Explosion, Compatibility, and Safety Hazards of Monomethyl-hydrazine*, Section II: Fire Hazards, 350-70.

Header will include: first page header – nothing, even page header – page number flush left, Author's Name centered (use tab key to align the name of the authors), odd page

header – running title centered (no more than 50 characters), page number flush right (use tab key for alignment).

The authors are solely responsible for the scientific content of the paper.

Authors are required to state that their contribution is original and it has not been previously published or submitted to another journal. Authors are asked to sign the copyright transfer agreement.

The submission will be made to dr. Ioana Stanculescu (ioana\_rs@yahoo.fr) – Editorial Secretary of ANALELE UNIVERSITATII BUCURESTI – CHIMIE, Department of Physical Chemistry, 4-12 Regina Elisabeta Blvd., District 3 Bucharest, 030018 Romania.
